DETAILED ACTION

Election/Restrictions

Claims 24, 27-28, and 38-46 are currently pending in this application.

The amendment filed on January 27, 2008, amending claims 24, and 27-28, canceling claims 1-23, 26, 29, 32, and 35-37, and adding new claims 38-44 is acknowledged. Claims 25, 30-31, and 33-34 remain cancelled.

Claims 24, 27-28 and 38-46 are under consideration and will be examined herein.

The newly added claims with new limitation raise new issues i.e. claims 38-41 comprise patentably distinct nucleic acid molecule encoding 2 different proteins. A new supplemental Restriction (species) requirement is deemed necessary for expedite the prosecution.

This application contains claims directed to the following patentably distinct species of elected claimed invention of Group III.

(A). protein of SEQ ID NO: 2 or a nucleic acid encoding SEQ ID NO: 2.

(B). protein of SEQ ID NO: 9 or a nucleic acid encoding SEQ ID NO: 9.

The polypeptides of subgroups (A) and (B) are unrelated and chemically distinct entities. The only shared technical feature of these subgroups is that they all relate to polypeptide SEQ ID NO: 9 having arginase activity. However, this shared technical feature is not a "special technical feature" as defined by PCT Rule 13.2 as it does not define a contribution over the art. A polypeptide human arginase I is known in the art (US Patent 6054308, publication 4/25/2000), which is 100% identical to SEQ ID NO: 9 of the instant application (see sequence alignment). Thus, polypeptides having arginase activity do not make contribution over the prior art. Thus, the species lack(s) special technical feature.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 24, 27 and 28 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
